# CRESCENT MOVEMENT

Crystals are fascinating natural formations. It takes millions of years of intricate processing and the elements (earth, fire, water, air and metal) for a crystal to form, which gives it ultimate universal and planetary wisdom. Therefore, they have been used for many years to the better human experience on this Earth. Throughout human history, crystals/stones have figured prominently in the various traditional practices of many ancient civilisations such as Sumerians, Mayans, Aztecs, Incas, Egyptians, etc. Although the ancient cultures had access to many precious gemstones, they preferred to use softer, semi-precious stones such as carnelian, lapis lazuli, quartz, labradorite and turquoise. The reason for those choices was the proper usage of crystals at their energetic and healing works for symbolic and deeper meaning.

Our crystals/stones are imported into Turkiye from different locations; Indian subcontinent, Caribbean or Asia are just the some of them. Later, these stones are processed with fine craftsmanship and presented to you with our elegant designs. In accordance with the policy adopted by our company, the originality of the stones is always reported in the laboratories.

Obviously, as each design became integrated with the energy of crystals, magnificent beauties emerged. We would like to bring you the designs of our company with this catalogue.

In a world where feminine energy is rising, in order to bring women to the fore,
